Professional Summary

Seasoned Test Analyst with over 5 years of experience in manual and automated testing across web and API applications. Skilled in designing and executing test strategies, automation frameworks, and regression suites using Selenium with Python, Pytest, and Requests for API validation. Proven ability to evaluate test objectives, develop optimized test procedures, and deliver detailed reports that drive product quality improvements. Strong expertise in requirement analysis, defect tracking to ensure high-quality software delivery.

Skills

- Selenium
- Python
- Test Complete
- JIRA
- HP ALM
- API testing
- Manual testing
- Pytest
- Behave
- Perforce

Projects

Project: [Client - Genesys]

Role: Automation Tester

Product: Genesys PureConnect – Interaction Dialer Application

- Worked as an **Automation Tester** for **end-to-end testing** of the Interaction Dialer application, part of the **Genesys PureConnect** product suite.
- Developed reusable automation scripts using Selenium, with Python and TestComplete, to validate functional changes across different modules, ensuring maintainability and scalability
- Conducted various testing activities including:
 - Functional Testing**
 - End-to-End Testing**
 - Regression Testing**
- Designed and maintained **custom automation frameworks** such as **Page Object Model (POM)** and **Hybrid Framework** using **pytest** and **Behave** for behavior-driven development.
- Performed **UI Testing** using Selenium to ensure frontend components work as expected across user journeys.
- Conducted API testing using the Requests library to validate: HTTP status codes, response headers, payload content, for ICWS (Interaction Center Web Services) APIs, ensuring compliance with backend service specifications
- Actively **modified automation scripts** to align with the latest requirements and maintained the **regression test suite**.
- Identified, logged, and tracked defects using **JIRA**, collaborating closely with the development team to ensure timely resolution.
- Responsible for **test execution delivery** within agreed timelines and **uploading test results to TCDB** on a weekly basis.

Professional Experience

Test Analyst

January 2022 to March 2024

Infosys Pvt Limited — Hyderabad, India

- Designed, developed, and executed manual and automated test cases for Interaction Dialer-based application suites in Genesys PureConnect.
- Automated web application testing using Selenium with Python, and validated APIs using the Requests library and Pytest framework.
- Conducted functional, regression, and compatibility testing for new features and updates to ensure stable integration with existing systems.
- Maintained and enhanced Python-based automation scripts and reusable Pytest test suites in alignment with

changing requirements.

- Created detailed test documentation, execution reports, and defect summaries to support the development team and ensure traceability throughout the QA lifecycle.

Test Engineer

March 2019 to December 2021

Infosys Pvt Limited — Hyderabad, India

- Created comprehensive test plans, scripts, and use cases to achieve testing objectives.
- Executed over 500 test cases during each regression cycle to maintain quality assurance.

Trainee Test Engineer

November 2018 to March 2019

Infosys Pvt Limited — Mysore, IN

- Trained in Fundamentals of Python and OOPS using Python
- Trained in writing and executing SQL queries
- Trained in automation tools like Selenium

Education

Bachelor of Technology : Mechanical Engineering, June 2016

Lovely Professional University — Jalandhar

GPA: 6.98

Awards

Infosys Insta Award for automation initiative, 2020, I was awarded to this award for introducing automation scope in my project using VB Scripting for ETL job data validation.
